CANTERBURY BANKSTOWN

Waste Management Plan C – Residential Flat Buildings

Occupancy Stage

The applicable sections of this Waste Management Plan (WMP) must be completed and submitted with your Development Application.

Completing this Plan will assist you in identifying the type(s) of waste that will be generated and will inform Council how you intend to reuse, recycle or dispose of this waste. The more detail you provide with your application will assist Council in reviewing your application. The amount of detail you provide with your application impacts the number of revisions and time taken with processing the DA.

The information you provide will be assessed against the objectives of the Development Control Plan 2021.

The WMP will need to be amended if changes are made to the development during the assessment process (e.g. changes to number of dwellings and relocation of the bin room).

If you require assistance completing your WMP, please contact Council's Waste Assessment Officers in the Resource Recovery Team on **9707 9000**.

If there is insufficient space within this template, please provide attachments.

Has a Demolition and Construction WMP been completed? The application will not be accepted if this WMP has not been completed.	
Yes	No

Provide a detailed description of the proposed development, please include dwelling type and number of dwellings as a minimum.

Applicant's signature:	
Date:	
If proposal has been discussed with Council's Waste Assessment Officers provide details.	

Standard service frequencies (as per Waste Design for New Developments Guide C)

	Service Frequency			
	General waste	**Recycling**	**Garden organics**	**Bulky waste (per calendar year)**
Low rise (two to four stories)	One collection per week	One collection per fortnight	One collection per fortnight **	Developments with six or less dwellings – two collections Developments with more than 6 dwellings but not greater than 50 – four collections *** Developments with more than 51 dwellings – six collections ***
Medium rise (five to eight stories)	One collection per week*	One collection per fortnight*	One collection per fortnight **	
High rise (nine or more stories)	Two collections per week*	One collection per week	One collection per fortnight	

Notes:

* *Frequency of service may be increased for medium to high rise residential flat buildings, only after discussion and recommendation of Council's waste management assessment officers.*

** *Alternative week to recycling service*

*** *Bookings to be made by building's caretaker, building manager or strata manager on behalf of the whole building.*

Generation rate and bin sizes

Council allocates bins at the rates prescribed in the Waste Design for New Developments Guide C. Standard bin dimensions are also detailed in the Guide. Bin allocations are rounded up to the next whole number (for example a calculation of 4.1 bins will be rounded to 5 bins).

Service	**Weekly generation rate / dwelling**	**Number of dwellings**	**Total weekly waste generation rate (weekly generation rate x number of dwellings)**
Garbage	140L		
Recycling	120L		
Garden waste	120L		

Service	**Bin size**	**Number of bins required ** **	**Standard collection frequency ***	**Approved alternate collection frequency *** **
Garbage	660L / 1,100L / Hook Lift		Weekly	
Recycling	660L / 1,100L		Weekly / Fortnightly	
Garden waste	240L		Fortnightly	N/A

Notes:

** Collection frequencies and bin selections are at Council's discretion.*

*** Calculation for number of bins =* $\left[\frac{\text{total weekly waste generated}}{\text{bin size}}\right] x$ *frequency of collection*

**** Alternate collection frequencies must be approved by Council prior to lodgement. Where this has been discussed with and approval given by Waste Assessment Officers, please provide details of the Council contact:*

<u>Management of Waste at Occupancy Stage</u> (Applicants should provide a description to show the requirements have been met)

1. Internal storage of waste			
Is there sufficient space allocated within each dwelling kitchen for two day's capacity of waste and recycling?	Yes	No	Specify location:
Is there sufficient space allocated within each dwelling kitchen for a caddy to collect food waste?	Yes	No	Specify location:
Is there sufficient space for the storage of bulky waste, textile waste and other problem waste?	Yes	No	Specify location:
Are the above storage and separation facilities shown on the plans accompanying the DA?	Yes		No
2. Food and garden organic waste – composting and worm farming			
How is food or garden waste managed on-site? (e.g. composting and/or worm farming, food waste processing system)	Specify location & type:		
Has the area been nominated on plans accompanying the DA?	Yes		No
3. Communal bin storage area			
Size and location of communal bin storage area to store allocated waste and recycling bins			
Has a scaled plan been submitted that illustrates the layout of the bin storage area and that it meets Section 5.3.1 of the Waste Design for New Developments Guide C?	Yes		No
4. Bulky Waste Area			
Size of bulky waste area and location:			
Has a scaled plan been submitted that illustrates the layout of the bulky waste storage area and that it meets Section 5.3.10 of the Waste Design for New Developments Guide C?	Yes		No
5. Supplementary recycling service (required for developments with 50 dwellings or more)			**N/A**
Size of additional recycling storage area:			
Has a scaled plan been submitted that illustrates the layout of the additional recycling storage area and that it meets Section 5.3.11 of the Waste Design for New Developments Guide C?	Yes		No

6. Collect and return service		On-site collection (go to question 8)
Is the communal bin storage area located within 10 metres of a layback to the kerbside collection point?	Yes	No
If no, has a temporary bin collection area been provided within 10 metres of a layback to the kerbside collection point?	Yes	No
Has the bin-carting route been identified on plans accompanying the DA?	Yes	No
Is the bin-carting route?		
a) non-slip, free from steps or obstructions;	Yes	No
b) Minimum 2m wide hard surface;	Yes	No
c) Does not pass through any internal walkways, doors or rooms;	Yes	No
d) maximum grade of 1:30 (3%);	Yes	No
e) Not within a driveway or carpark; and	Yes	No
f) Compliant with Work, Health and Safety for collection staff	Yes	No

7. Temporary collection area (collect and return)		
Is a temporary collection area needed?	Yes	No
Is the temporary collection area within 10m of the kerbside collection point?	Yes	No
Has a scaled plan been submitted that illustrates the temporary holding area layout and that it meets Section 5.3.2 of the Waste Design for New Developments Guide C?	Yes	No

8. On-site collection of waste: On-site collection is required if the development has been deemed by Council to be unsuitable for collect and return.		
Is on-site collection required?	Yes	No
Has the development been designed to ensure that access to the collection point can be undertaken by a Heavy Rigid Vehicle as per AS 2890.2 and in accordance with Sections 5.3.4 and 5.3.5 of the Waste Design Guide for New Developments C?	Yes	No
In which of the following ways will on-site collection of waste, recycling, bulky waste and additional recycling take place?		
In the building's basement; or	Yes	
At ground level	Yes	
Specify location of the dedicated collection or loading bay		
Is the DA accompanied by scaled AutoCAD swept path diagrams for a Heavy Rigid Vehicle, which demonstrates the waste collection vehicle can enter and exit in a forward direction, minimises manoeuvring within the site and can access the nominated loading area?	Yes	No
Is the DA accompanied by a traffic statement confirming the on-site collection point has been designed to comply with the Heavy Rigid Vehicle requirements in AS 2890.2?	Yes	No

9. Temporary collection area (on-site collection)		
Is a temporary collection area needed?	Yes	No
Is the temporary collection area within 5m of the on-site collection point?	Yes	No
Has a scaled plan been submitted that illustrates the temporary collection area layout and that it meets Section 5.3.7 of the Waste Design Guide for New Developments C?	Yes	No
10. Garbage chute system and recycling cupboard		**N/A**
Is there a garbage chute system proposed?	Yes	No
How many floors will the chute service?		
Is there a recycling cupboard provided on each residential floor adjacent to the chute hopper?	Yes	No
Has a bin storage room been provided where the waste chute terminates?	Yes	No
Is there a bin lifting machine provided to assist with condensing 240L recycling bins on each floor into bulk bins for collection?	Yes	No
Is a bin lifting machine shown at scale on site plans?	Yes	No
Has a scaled plan been submitted that illustrates the garbage chute system and recycling cupboards and that it meets Sections 5.3.8 and 5.3.9 of the Waste Design for New Developments Guide C?	Yes	No
11. Ongoing use		
Will there be an on-site caretaker responsible for managing waste?	Yes	No
How often are they on-site and what are their duties in relation to waste management facilities?		
Will bin-handling equipment be provided to assist the caretaker with bin-carting (to comply with WH&S requirements)?	Yes	No
Is the bin storage area/s accessible to waste collection staff (no security locks or devices)?	Yes	No
Do you agree to provide a deed of agreement and indemnity to Council and its collection Contractors for the provision of residential collection service?	Yes	No
