CANTERBURY BANKSTOWN

Waste Management Plan D – Boarding Houses

Occupancy Stage

The applicable sections of this Waste Management Plan (WMP) must be completed and submitted with your Development Application.

Completing this Plan will assist you in identifying the type(s) of waste that will be generated and will inform Council how you intend to reuse, recycle or dispose of this waste. The more detail you can provide with your application will assist Council in reviewing your application. The amount of detail you provide with your application impacts the number of revisions and time taken with processing the DA.

The information you provide will be assessed against the objectives of the Development Control Plan 2021.

The WMP will need to be amended if changes are made to the development during the assessment process (e.g. changes to number of rooms and relocation of the bin storage room).

If you require assistance completing your WMP, please contact Council's Waste Assessment Officers in the Resource Recovery Team on **9707 9000**.

If there is insufficient space within this template, please provide attachments.

Has a Demolition and Construction WMP been completed? The application will not be accepted if this WMP has not been completed	
Yes	No

Provide a detailed description of the proposed development, including number of rooms as a minimum.

Applicant Signature:	
Date:	
If proposal has been discussed with Council's Waste Assessment Officers provide details.	

Standard service frequencies (as per Waste Design for New Developments Guide D)

General Waste	Recycling
One collection per week *	One collection per fortnight *

Note:
** Frequency of service may be increased for large sized boarding houses, only after discussion and recommendation of Council's waste management assessment officers.*

Weekly Waste Generation Rates per Room

Type of Boarding House*	General waste	Recycling
Traditional	60L	30L
New Generation	100L	90L

Note:
** A traditional boarding house has shared facilities such are kitchens and bathrooms. A new generation boarding house has self-contained rooms with private facilities such as ensuite bathrooms and kitchenettes.*

Bin Size and Collection Frequency

Council allocates bins at the rates prescribed in the Waste Design for New Developments Guide D. Standard bin dimensions are also detailed in the Guide. Bin allocations are rounded up to the next whole number (for example the calculation of 4.1 bins will be rounded to 5 bins).

Service	Weekly Generation Rate / Room (based on Generation Table above)	Number of Rooms	Total Weekly Waste Generation Rate
Garbage			
Recycling			

Service	Bin Size	Number of bins required *	Standard collection frequency *
Garbage	240L / 660L / 1,100L		Weekly
Recycling	240L / 660L / 1,100L		Fortnightly

Notes:
* *Frequency of service may be increased for large sized developments, only after discussion and recommendation of Council's waste management assessment officers.*

** *Calculation for number of bins* $= \left[\frac{\text{total weekly waste generated}}{\text{bin size}} \right] \times$ *frequency of collection*

Management of Waste at Occupancy Stage (Applicants should provide a description to show the requirements have been met)

1. Internal storage of waste			
Is there sufficient space allocated within each room for two day's capacity of waste and recycling?	Yes	No	Specify location:
Is there sufficient space allocated within communal areas for two day's capacity of waste and recycling?	Yes	No	Specify location:
Is there sufficient space allocated within each room/communal kitchen for a caddy to collect food waste?	Yes	No	Specify location:
Is there sufficient space for the storage of bulky waste, textile waste and other problem waste?	Yes	No	Specify location:

2. Communal Bin Storage Area		
Has a communal bin storage area been provided to store all waste and recycling bins?	Yes	No
Has a scaled plan been submitted that illustrates the layout of the bin storage area and that it meets Section 5.3.1 of the Waste Design for New Developments Guide D?	Yes	No

3. Kerbside Collection – developments with 14 rooms or less only	N/A	
Confirm kerbside collection points are located so they: • Present all allocated bins in single file with a 30cm gap between bins; • Ensure all allocated bins are placed within the site's allocated frontage, not in the driveway and not in front of neighbouring lots; • Have a height clearance of 4.2m from overhanging tree branches, powerlines and other obstructions; and • Have a separation distance of 2m from street trees, bus stops, street furniture, intersections and road infrastructure such as roundabouts and speed humps.	Yes	No – collect and return service
Has a kerbside collection point been nominated on the plans accompanying the DA?	Yes	No

4. Collect and Return service	N/A	
Is the communal bin storage area located within 10 metres of a layback to the kerbside collection point?	Yes	No
If no, has a temporary bin holding area been provided within 10 metres of a layback to the kerbside collection point?	Yes	No
Has the bin-carting route been identified on plans accompanying the DA?	Yes	No
Is the bin-carting route?		
a) non-slip, free from obstructions;	Yes	No
b) Minimum 2m wide hard surface;	Yes	No
c) Does not pass through any internal walkways, doors or rooms;	Yes	No
d) Maximum grade of 1:30 (3%);	Yes	No
e) Not within a driveway or carpark; and	Yes	No
f) Compliant with Work, Health and Safety for collection staff	Yes	No

5. Temporary collection area (collect and return)		
Is a temporary collection area needed?	Yes	No
Is the temporary collection area within 10m of the kerbside collection point?	Yes	No
6. Bulky waste area		
Has a bulky waste storage area been provided?	Yes	No
Size of bulky waste area and location:		
Has a scaled plan been submitted that illustrates the layout of the bulky waste storage area and that it meets Section 5.3.3 of the Waste Design for New Developments Guide D?	Yes	No
7. On-site collection of waste		
Is on-site collection required? On-site collection is required if the development has been deemed by Council to be unsuitable for kerbside or collect and return.	Yes	No
Has the development been designed to ensure that access to the collection point can be undertaken by a Heavy Rigid Vehicle as per AS 2890.2 in accordance with Section 5.3.4 and 5.3.5 of the Waste Design Guide for New Developments D?	Yes	No
In which of the following ways will on-site collection of waste, recycling, bulky waste and additional recycling take place?		
In the building's basement; or	Yes	
At ground level.	Yes	
Specify location of the dedicated collection or loading bay		
Is the DA accompanied by scaled AutoCAD swept path diagrams for a Heavy Rigid Vehicle, which demonstrates the waste collection vehicle can enter and exit in a forward direction, minimises manoeuvring within the site and can access the nominated loading area?	Yes	No
Is the DA accompanied by a traffic statement confirming the on-site collection point has been designed to comply with the Heavy Rigid Vehicle requirements in AS 2890.2?	Yes	No
8. Temporary holding area (on-site collection)		
Is a temporary holding area needed?	Yes	No
Is the temporary holding area within 5m of the on-site collection point?	Yes	No
Has a scaled plan been submitted that illustrates the temporary holding area layout and that it meets Section 5.3.7 of the Waste Design Guide for New Developments D?	Yes	No

9. Ongoing Use		
Will there be a caretaker on site responsible for managing waste?	Yes	No
How often are they on site and what is their role in relation to waste management facilities?		
Will bin-handling equipment be provided to assist the caretaker with bin-carting (to comply with WH&S requirements)?	Yes	No
Is the bin storage/temporary collection area/s accessible to waste collection staff (no security locks or devices)?	Yes	No
Do you agree to provide a deed of agreement and indemnity to Council and its collection Contractors for the provision of residential collection service?	Yes	No
Additional information:
